

ZERO-STAGE ASSETS FOR HARDWARE

2026

THE HARDWARE LAUNCH ENGINE

Launch Pre-Sales Before The Factory Delivers.

Proudly Presented:

GORAN DAMNJANOVIC

THE PROTOTYPE BOTTLENECK

Launching hardware means waiting months for supply chains to deliver final prototypes. You can't shoot a high-end marketing campaign with a flawed, 3D-printed dummy. This delay kills your launch momentum

Waiting for physical prototypes burns your runway.

THE V10 ARCHITECTURE

WE BRIDGE THE GAP BETWEEN ENGINEERING AND MARKETING. BY FEEDING YOUR MANUFACTURING CAD FILES DIRECTLY INTO THE V10 ENGINE, WE MATHEMATICALLY SIMULATE FLAWLESS BRUSHED ALUMINUM, MATTE SILICON, AND GLOWING LEDS

[DOWNLOAD RAW 150MP SAMPLE](#)

ENGINEERED PERFECTION

- **Material Physics:** Pixel-perfect simulation of anodized aluminum, carbon fiber, and glass.
- **Absolute Control:** No unwanted studio reflections on curved metallic surfaces
- **Instant Iteration:** Need the device in Space Grey and Matte Black? Calculated in minutes.

THE CROWDFUNDING ADVANTAGE

Dominate Kickstarter or Shopify instantly. Generate stunning, hyper-realistic campaign imagery and secure investor funding weeks before the factory tooling is even finished.

THE HARDWARE ADVANTAGE

Launch marketing campaigns 60 days faster by skipping prototype shipping delays.

Eliminate set-building, lifestyle studio rentals, and macro-photographers.

Eliminate set-building, lifestyle studio rentals, and macro-photographers.

INITIATE THE LAUNCH.

DOMINATE THE CROWDFUNDING SPACE. LET'S ENGINEER YOUR VISUAL NARRATIVE
