

ZERO-STAGE ASSETS FOR BEVERAGE

2026

THE LIQUID DYNAMICS PROTOCOL

Flawless Condensation. Zero Studio Mess

Proudly Presented:

GORAN DAMNJANOVIC

THE STUDIO NIGHTMARE

Capturing the perfect ice-cold beverage shot is a logistical nightmare. Ice melts under hot studio lights, condensation has to be faked with toxic sprays, and managing liquid splashes requires expensive robotic camera rigs.

Physical physics fight against traditional photography.

THE V10 ARCHITECTURE

WE REWRITE THE LAWS OF PHYSICS. BY UTILIZING ADVANCED FLUID DYNAMICS AND PBR MATERIAL RENDERING, WE GENERATE 150MP CAMPAIGN-READY BEVERAGE ASSETS ENTIRELY IN A DIGITAL ENVIRONMENT.

[DOWNLOAD RAW 150MP SAMPLE](#)

ALGORITHMIC REFRESHMENT

- **Micro-Condensation:** Mathematically simulated water droplets that never dry out
- **Fluid Dynamics:** Perfect splashes and pours engineered through raw data.
- **Flawless Aluminum:** Absolute control over metallic label reflections.

THE FLAVOR EXPANSION

Expanding your product line? Don't organize a new shoot. We take your Master Asset and instantly generate your new Mango, Berry, or Citrus flavors by mathematically swapping label and fluid colors.

Now 31-38

THE BEVERAGE ADVANTAGE

Deploy ad creatives for new flavors instantly.

Eliminate high-speed phantom cameras, food stylists, and liquid rigging setups.

One digital master asset ensures your can looks perfectly identical globally.

INITIATE THE ENGINE.

OUTPERFORM THE HERITAGE BRANDS. LET'S MATHEMATICALLY ENGINEER YOUR NEXT FLAVOR.
