

PREMIUM ENTERPRISE LICENSE

Commercial Rights Transfer and Technical Usage Agreement

Licensor: Goran Damnjanović | Visionary Factory
(aitoolsprosmart.com) **License Type:** Global Enterprise
(Non-Exclusive, Perpetual, Commercial) **Subject of License:**
[INSERT PRODUCT/PACKAGE NAME] **Format and**
Specification: [E.g., High-Res Digital Assets / UI Templates /
Video Footage]

1. SUBJECT AND SCOPE OF THE LICENSE

This document constitutes a legally binding agreement between the Licensor and the Licensee (Client). By purchasing this digital product, the Client is granted a non-exclusive, perpetual, and worldwide right to use the purchased digital assets for commercial and non-commercial purposes, in accordance with the terms defined herein.

2. GRANTED RIGHTS (PERMITTED USAGE)

The Client is granted the right to unlimited use of the purchased assets, without the obligation of author attribution (crediting), in the following domains:

- **Global Digital Campaigns:** Unlimited usage in paid advertising (Meta, Google, TikTok, etc.), on websites, applications, software, and UI/UX interfaces.
- **Print, OOH, and Merchandising:** Usage in all print media formats (catalogs, billboards, product packaging), with no limitations on print run or circulation.
- **Broadcasting and Production:** Integration into video production, TV commercials, films, music videos, and corporate presentations.
- **Creative Modification:** The Client has the full right to alter, crop, animate, retouch, color-grade, and combine the visuals and files with their own design solutions.

3. PROHIBITED RIGHTS (RESTRICTIONS)

While commercial use within the Client's own projects is unrestricted, the following actions constitute a direct infringement of copyright:

- **Resale and Distribution:** The resale, sharing, sublicensing, or redistribution of the raw files to third parties is strictly prohibited. The files may not be uploaded to stock platforms or open-source databases in their original (or slightly modified) form.
- **AI Model Training (Data Mining):** The use of these files for training, calibrating, or developing other machine-learning or artificial intelligence models is strictly prohibited.
- **Claiming Original Authorship:** The Client may not claim to have independently created the source code, base structure, or foundational raw visual (although they retain full ownership of the final end-product into which the assets are integrated).

4. LEGAL AND TECHNICAL GUARANTEE

The digital assets are delivered at the highest technical standard ("Client-Ready"). All copyrights and intellectual property regarding the original files remain the exclusive property of the Licensor, while the Client purchases the right to commercial exploitation.

This license enters into force and becomes legally binding the moment the Client successfully completes the payment via the official Security Checkout system on the platform. In the event of a breach of the restrictions outlined in Section 3, this license is automatically revoked without the right to a refund.
