

V10 VIDEO ARCHITECTURE

2026

CINEMATIC MOTION

Proudly Presented:

GORAN DAMNJANOVIC

BEYOND THE PHANTOM CAMERA

Capturing macroscopic fluid dynamics, fire, and high-speed motion requires heavy robotic arms, Phantom cameras, and infinite takes. The laws of physics limit what you can shoot. We bypass physical cameras entirely. We rewrite the physics.

- **PHYSICAL LIMITATIONS:** Gravity and thermodynamics ruin perfect takes.
- **LOGISTICAL OVERHEAD:** Expensive high-speed rigs and specialized crews.
- **POST-PRODUCTION HELL:** Weeks of cleaning up messy physical FX..

ENGINEERED THERMODYNAMICS

V10 VIDEO ARCHITECTURE SIMULATES PHYSICAL FORCES MATHEMATICALLY. WE CONTROL VISCOSITY, GRAVITY, PARTICLE COLLISIONS, AND THERMAL HEAT AT THE MICRO-LEVEL, RENDERING FLAWLESS HIGH-SPEED CINEMATIC MOTION THAT DEFIES REALITY.

CAMPAIGN-READY MOTION

From the glowing thermal heat of a hypercar exhaust to the perfect slow-motion pour of a luxury spirit. We deliver impossible video assets that dominate global digital campaigns

ANIMATE THE IMPOSSIBLE
